

Ideation Phase Empathize & Discover

Date	25 June 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	4 Marks

Empathy Map Canvas:

An **Empathy Map** is a visual tool used to understand the users or customers of a product by analyzing their perspectives. It helps identify what the user says, thinks, does, and feels regarding a particular problem. By understanding the user's needs, challenges, and emotions, teams can develop solutions that are more user-friendly and customer - centric.

Empathy Map for Smart Lender:

The empathy map for the Smart Lender Loan Eligibility Prediction System focuses on understanding the experiences and concerns of loan applicants. Applicants often want a quick and transparent loan approval process and worry about whether their loan will be approved. They fill out application forms, submit documents, and frequently check their application status. At the same time, they may feel anxious, confused, or frustrated due to lengthy and complex procedures. Understanding these behaviors and emotions helps in developing an intelligent system that provides fast, accurate, and transparent loan eligibility predictions, improving the overall user experience.
