Customer Journey Map:

A Customer Journey Map is a visual representation of the steps a customer follows while interacting with a product or service. It helps identify the customer's actions, thoughts, emotions, and touch points at each stage of their journey. By understanding the user's experience, organizations can improve their services and create better customer-centric solutions.

Customer Journey Map for Smart Lender:

The Customer Journey Map for the Smart Lender Loan Eligibility Prediction System illustrates the complete journey of a loan applicant, starting from learning about the platform, entering personal and financial details, receiving the loan eligibility prediction, and taking further actions based on the result. It highlights the applicant's interactions, concerns, and emotions throughout the process and helps in designing a fast, transparent, and user-friendly loan prediction system that improves the overall customer experience.

Example:

Phase of Journey	 Stage 1 Awareness Learns about the system	 Stage 2 Application Provides information	 Stage 3 Prediction System analyzes data	 Stage 4 Result Receives prediction	 Stage 5 Next Steps Takes further action
 Actions What does the customer do?	- Learns about Smart Lender through website, advertisement or recommendation. - Visits the Smart Lender platform. - Explores features and how it works.	- Clicks on "Check Eligibility". - Fills in personal, financial and loan details. - Uploads required documents (if needed). - Submits the application.	- System validates the provided data. - ML model analyzes applicant details. - Calculates eligibility based on multiple factors.	- Views loan eligibility result (Eligible / Not Eligible). - Checks eligibility score and important insights. - Reviews suggested actions or recommendations.	- If eligible, proceeds to apply with lender. - If not eligible, improves profile based on suggestions. - Rechecks eligibility in future.
 Touchpoint What part of the service do they interact with?	- Website / Social Media - Online Ads / Referrals - Landing Page - System Information Page	- Registration / Login - Application Form - Document Upload Section - Submit Button	- Backend Data Processing - ML Model Engine - Eligibility Calculation Module - Data Security & Validation	- Result Page - Eligibility Score - Insights & Recommendations - Download / Share Option	- Apply Now / Redirect to Lender - Suggestions to Improve Eligibility - Save & Check Again - Customer Support (if needed)
 Customer Thought What is the customer thinking?	- Is this platform trustworthy? - How does this system work? - Can this help me check my loan eligibility quickly?	- Which details are required? - Is my data safe and secure? - Will this information affect my credit score?	- How is my eligibility being calculated? - What factors are most important in the decision? - Is the prediction accurate?	- Am I eligible for the loan? - Why am I eligible / not eligible? - What can I do to improve my chances?	- What should be my next step? - How can I increase my eligibility? - When should I apply again?
 Customer Feeling What is the customer feeling?	- Curious - Hopeful - Cautious	- Focused - Concerned about data security - Expectant	- Anxious - Hopeful - Patient	- Relieved (if eligible) - Disappointed (if not eligible) - Satisfied with insights	- Motivated to improve - Confident (if eligible) - Optimistic about future
 Process Ownership Who is in the lead on this?	- Marketing Team - Product Team - Business Development Team	- Applicant (User) - Frontend System - Support Team (if needed)	- System (ML Model) - Data Processing Module - Backend Team	- System (Result Engine) - Analytics Module - Support Team (if needed)	- Applicant (User) - Lender / Bank (if applied) - Support Team (if needed)
 Opportunities How can we improve this stage?	- Increase awareness through targeted marketing. - Improve website clarity and user interface.	- Simplify the application form. - Provide clear instructions and examples. - Ensure data security & privacy.	- Improve model accuracy. - Reduce prediction time. - Provide transparent evaluation criteria.	- Present results in an easy to understand way. - Provide actionable insights and recommendations.	- Offer personalized suggestions to improve eligibility. - Enable easy recheck of eligibility. - Provide quick support and FAQs.
