

Project Demo Planning

Date	1 July 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	1 Mark

Project Demo Planning:

A well-planned demonstration helps present the **SmartLender – Loan Prediction System** in a clear and organized manner. The demo highlights the project's objectives, system workflow, machine learning model, and web application. Each team member is assigned a specific responsibility to ensure smooth coordination and effective presentation. The following plan outlines the demo sections, duration, and responsible members.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project objectives, problem statement, and motivation behind Smart Lender.	2	Brundha Madiraju
2	Dataset & Data Preprocessing	Explain the dataset, preprocessing, balancing, feature scaling, and train-test split.	3	Reddamma Katadasari
3	Machine Learning Model	Demonstrate model training, comparison of algorithms, and selection of the Random Forest model.	3	Venkata Poojitha Peddi Boina
4	Web Application Demonstration	Demonstrate the Home Page, Loan Application Form, prediction process, and Result Page.	3	Potturi Naga Vydehi
5	Results & Performance Evaluation	Present the comparison graph, confusion matrix, prediction accuracy, and saved model.	2	Jala Rahul Kumar
6	Conclusion, Future Scope & Q&A	Summarize the project, explain future enhancements, and answer audience questions.	2	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the problem, objectives, and need for the Smart Lender system.
2	Solution Overview	Describe the system architecture, dataset, preprocessing, and machine learning workflow.
3	Live Feature Demonstration	Demonstrate the web application by predicting a loan approval using sample inputs.
4	Q&A Session	Discuss the results, future scope, and answer questions from the evaluators.
