

Project Executable Files

Date	29 June 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	3 Marks

Project Executable Files

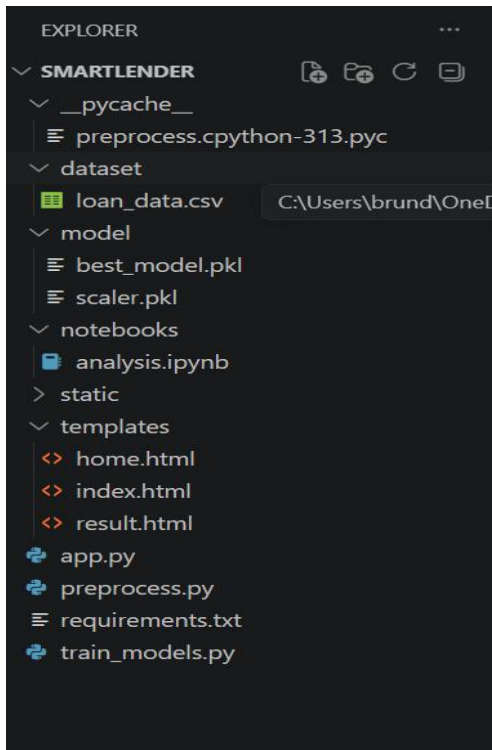

The Smart Lender project includes all the necessary source code, machine learning models, HTML templates, CSS files, dataset, and dependency files required to run the application. The project is organized into separate folders for easy understanding and maintenance. Clear setup instructions are provided to help the evaluator execute the project successfully in a local environment.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar) ^{or}	No
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Deployed
Login Credentials (Demo)	Not Applicable
Platform / Hosting Provider	Local Flask Server
Repository Link	https://github.com/BrundhaMadiraju/Smart_Lender/tree/main
Demo Video Link	https://drive.google.com/file/d/1PsImT-WSZ8RNJGEtiVXy6nMHAgD6iAYi/view?usp=drivesdk

Step 4: Run Instructions

Steps to run the application:

1. Install Python and the required libraries using `pip install -r requirements.txt`.
2. Open the project folder in Visual Studio Code.
3. Run `python app.py` in the terminal.
4. Open `http://127.0.0.1:5000/` in a web browser.
5. Enter the applicant details and click **Predict** to view the loan eligibility result.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Application runs only on a local server	Can be deployed on cloud platforms in the future
2	No user authentication feature	Can be added in future versions
3	Prediction depends on the training dataset	Model accuracy can be improved using larger datasets
